# Roadmap to Sustainability

## Our Goals

- Water Conservation
- Waste Diversion (Recycling)
- Energy Conservation
- Green Procurement
- Sustainable Buildings

- Reduce Petroleum Usage
- Conserve Natural Resources
- Protect Threatened & Endangered Species
- Enhance the landscape's suitability for training.

# Roadmap to Sustainability

## Conserve Energy

- Keep windows and doors shut.
- Close shades during the day.
- Use ceiling fans – most use less energy than a light bulb!
- Only run full loads of dishes and clothes.
- Make sure your dryer's outside vent is clear.
- Clean the lint filter after every load.
- Invest \$10 to insulate your water heater.
- Use caulking, sealing or weather stripping to repair air leaks.
- Look for the Energy Star ® label on new appliances.
- Look for the EPEAT label when purchasing electronics.

# Roadmap to Sustainability

## Water Conservation

- Turn off the water while you brush your teeth.
- Install low-flow shower heads, faucets, and toilets.
- Take a shower (25 gallons) instead of a bath (70 gallons).
- Only run the dishwasher & washing machine when full.
- Sweep the driveway instead of using a garden hose.
- Throw a dropped ice cube in a flower pot instead of down the drain.
- Wash your fruits and vegetables in a pan of water instead of running water from the tap.
- Monitor your water bill to help find and fix leaks.
- Landscape with native plants.

Georgia's population growth is placing ever-increasing strain on our water supply.

During the summer, residential water use increases significantly when citizens use water outdoors for landscape maintenance, recreation and cleaning.

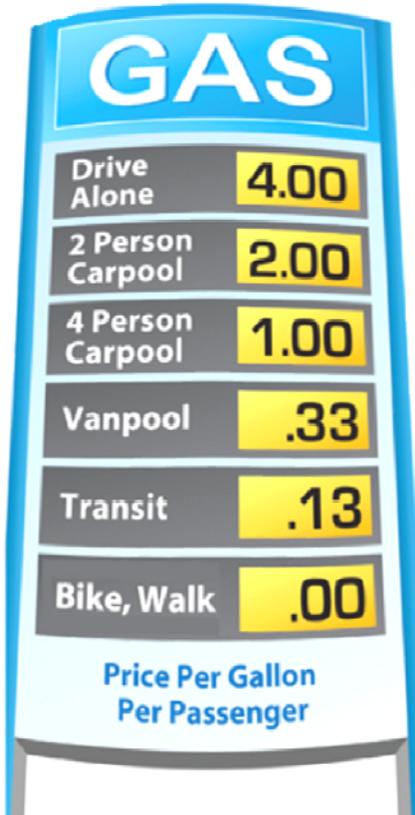

As water becomes more limited, water conservation is essential. A water-wise landscape can reduce outdoor water use by as much as 50 percent.

# Roadmap to Sustainability

## Reduce Petroleum Usage

- Drive the speed limit or five miles below.
- Stick to a regular maintenance schedule.
- Keep your tires properly inflated.
- Avoid unnecessary braking and accelerating too quickly.
- Reduce car weight by removing unneeded objects.
- Organize your errands into the most efficient route.
- Avoid unnecessary idling... more than 30 seconds = shut it off!

## "Green" Your Home

- Look for the Energy Star logo when buying new appliances.
- Purchase electronics that are EPEAT registered.
- Look for the Water Sense log when selecting plumbing fixtures.
- Purchase eco-friendly cleaners.
- Install a programmable thermostat.
- Put an aerator on all household faucets.
- Carry your own reusable bottle for water and cold drinks.
- Replace old light bulbs with compact fluorescent light bulbs (CFLs).
- Buy "tree-free" 100% post-consumer recycled paper for everything from greeting cards to toilet paper.
- Drying your laundry on a clothesline or rack you can save 700 pounds of carbon dioxide emissions a year.

# Roadmap to Sustainability

## Recycle

- Don't throw away bottles, cans, or plastic containers.
- Keep paper and cardboard separate.
- Keep recyclables free of oil, grease, & other liquids.
- No community recycling center? Bring them here!
- Drop them off at any blue dumpster or recycling convenience center.
- Encourage your friends and family to recycle as well.
- Recycle at work and at home.
- Make it a daily habit!
