Spring Safety

5 Apr 13

1. Spring Safety Topics. As winter melts away everyone's thoughts turn to springtime and the feeling of a world reborn. As you, your family, employees and co-workers head out into the warm spring air be sure to review and discuss spring safety topics to keep everyone safe. A few suggested topics that are important to consider include:

**Allergies** - Allergies are a big part of spring for many people. Get advice from your doctor on which allergy medication to keep handy and have it ready for anyone in the family that needs it. Be aware of any potential "side effects" of the medications.

**Cleaning** - Over the winter some dangerous household chemicals such as paint thinner and chemical cleaners may have sat in the garage or under the kitchen sink. Contact your local waste authority and find out how to properly dispose of these chemicals.

**Fire Safety** - The warm days of spring are a good time to go over the fire escape plan with your family and start doing some practice drills to make sure everyone knows what to do and where to go.

**Mower Safety** - The lawn mower has been sitting all winter and needs a few things done before it can safely be used. Make sure to change out all of the fluids in the mower, and clean out any old grass that is still on the blade. Don't neglect other power tools you use to complete your yard beautification!

**Home Improvement** – Home improvement accidents send hundreds of thousands of people to the emergency room each year. If you're determined to tackle a do-it-yourself (DIY) project - Good for you! Just make sure safety is a part of your plan and you understand the operation (and safety cautions) for all tools!

**Pool Safety** - Spring is when it is time to open the pool and enjoy fun and sun in the backyard. Before opening the pool be sure to go over the safety rules with everyone that will be using it. Check your pool components such as the skimmer and filter thoroughly before opening the pool. Understand the dangers of unattended pools and the attraction factor for those little ones – not only in the family, but visitors and neighbors as well. Proper use and storage of pool chemicals is essential!

The US Army Readiness/Safety Center has additional topics and products you can use in your safety program. Check it out at:

<https://safety.army.mil/multimedia/CAMPAIGNSINITIATIVES/KnowtheSigns/SpringSafety2013/tabid/2400/Default.aspx>

Another great source of information is the IMCOM Safety Spring and Summer Brochure. Download a copy at: <http://www.imcom.army.mil/Portals/0/hq/organization/safety/SpringSummer.pdf>

## 2. Fort Stewart/HAAF Pre-Accident Indicators:

Fort Stewart						
DUI	Speeding	Use of Cell Phone While Operating M/V	Traffic Accident (At Fault)	No Driver License	Disregard Traffic Control Device	Heat Related Injury
17	93	4	7	13	3	0
Color Code: Compared to last report - <b>Green = Decrease</b> ; <b>Red = Increase</b> ; <b>Amber = No Change</b> .						
FY13 To Date Totals (Since 1 October)						
103	487	33	46	185	52	0
Data Includes Incidents Involving Fort Stewart Personnel – USAG + Supported Organizations						

Hunter Army Airfield						
DUI	Speeding	Use of Cell Phone While Operating M/V	Traffic Accident (At Fault)	No Driver License	Disregard Traffic Control Device	Heat Related Injury
16	10	1	3	1	4	0
Color Code: Compared to last report - <b>Green = Decrease</b> ; <b>Red = Increase</b> ; <b>Amber = No Change</b> .						
FY13 To Date Totals (Since 1 October)						
62	138	34	16	62	59	0
Data Includes Incidents Involving HAAF Personnel – USAG + Supported Organizations						

## 3. Additional Safety related information can be obtained from:

- [Fort Stewart Safety Web Page](#)
- [US Army Safety Center](#)

4. **Lightning Safety on Sports Fields and Golf Courses.** (Submitted by: Mr. Gary Danhof, Aviation Safety Specialist)

**Outdoor sports and thunderstorms are a deadly combination.** Lightning in open fields kills more people than any other outdoor place. Outdoor sports activities on large open fields—like soccer, golf, baseball, and softball—usually peak during thunderstorm season in most states. Players, coaches, and staff often push their luck when thunderstorms threaten their safety, hoping to get one more hole in, one more kick off, or one more batter up. The consequences can be deadly. They don't have to be.

**There is no reason to be caught off guard by a thunderstorm.** The best way to avoid lightning is not put yourself, family, and friends in danger in the first place. No one should be caught "off guard" by thunderstorms. Weather information is all around you. You can:

- Listen to weather reports on the radio
- Watch current weather forecast on TV
- Read current weather information on the Internet
- Tune in on your NOAA Weather Radio

**Manage The Risk – Protect The Force**

For additional information contact:

Your Unit Addition Duty Safety Officer (ADSO) or Collateral Duty Safety Person (CDSO), or

USAG Installation Safety Office: Fort Stewart Office @ 912-767-7880; Hunter Army Airfield Office @ 912-345-4905.

- Sign up for lightning notification services
- Scan the skies 360 degrees around you and overhead

If weather warnings or your own observations confirm that thunderstorms will be near where your activity is planned, re-schedule your activity or change your plans. Yes, changing your plans may be inconvenient for you and others. But no line drive or putt or final score is worth being killed or disabled by lightning.

**Know the lightning safety warning program at your outdoor sports facility.** Outdoor recreational facilities, such as golf courses, should have a formal lightning warning policy that meets these two basic requirements:

- Lightning danger warnings can be issued in time for everyone to get to safe shelter.
- There is access to adequate safe shelter—such as a clubhouse or locker room.

**Watch for thunderstorms and use the 30/30 rule.** During thunderstorms, no place outside is safe. But you can minimize your risk if thunderstorms develop or approach during your game by following these steps:

**Step 1:** Designate someone from your group to be the storm watcher.

**Step 2:** Use the 30/30 rule. (See below)

**The 30/30 rule:**

**Step 1:** When you see lightning, count the seconds until you hear thunder.

**Step 2:** If this time is 30 seconds or less, quickly go inside a substantial building. If such a building is not available, a metal-topped vehicle is the next best choice.

**Step 3:** Wait at least 30 minutes after seeing the last lightning or hearing the last thunder before going back outside.

**Your last resort is stay low and stay away from trees and other tall things.** If you're still outdoors and lightning has struck close to you, crouch down into a ball on the balls of your feet. Your goal is to be the smallest target possible with the least contact with the ground. Do not seek shelter under tall or isolated trees or unsubstantial shelters. It's better to be wet from the rain than dead or disabled from lightning.

## 5. Safety Office Publications – FY13

a. Safety Update:

- 1) Safety Update # 13-01, First Publication
- 2) Safety Update # 13-02, Providing a Safe and Healthy Working Environment
- 3) Safety Update #13-03, Providing a Safe and Healthy Working Environment (#2)

b. Safety Gram:

- 1) 13-01 - Handgun Safety
- 2) 13-02 - UXO Safety
- 3) 13-03 – Fall Clean-up
- 4) 13-04 - Hunting Safety
- 5) 13-05 – Halloween Safety
- 6) 13-06 – Turkey Fryer Safety
- 7) 13-07 – Toy Safety
- 8) 13-08 – Travel Safety
- 9) 13-09 – Tree Safety
- 10) 13-10 – National Impaired Driving Month

c. Safety Alerts: (none)
